

System and Unit Test

Quick Quotes

Quick Quotes Team

March 14, 2023

System Test Scenarios:

Sprint 1:

User stories:

- As a person with both an apple and android device, I want to be able to open the app in a mobile platform of my choice.

Scenario:

- 1) Start the Quick Quotes app with an android or ios mobile device

Sprint 2:

User stories:

- As someone who isn't tech savvy, I want to be able to navigate a simple and intuitive app interface.
- As a learner, I want to press a button and receive a quote

Scenario:

- 1) Start the Quick Quotes app
- 2) Press the navigation buttons at the bottom of the screen to navigate between the Subjects, Settings, and QuoteFeed pages
- 3) Navigate to the QuoteFeed page and press the "Give me a quote!" button at the bottom of the screen to receive a quote
- 4) User should see a quote added to their quote feed displaying the quote, author, and tag/subject

Sprint 3:

User stories:

- As a person who wants to show the quotes I receive to friends, I want to be able to save quotes for later.

Scenario:

- 1) Start the Quick Quotes app
- 2) Press one of the quotes in the feed and press the "Bookmark" button to save a quote

Sprint 4:

User stories:

- As a helpful community member, I want to share quotes with friends and family.
- As a critic, I want to rate and comment on quotes that I receive.

Scenarios:

- 1) Start the Quick Quotes app
- 2) Navigate to the Quote Feed page
- 3) Press the "Give me a quote!" button at the bottom of the screen to receive a quote
- 4) Press on the quote to display additional quote information
- 5) Press on the "Share" button. The quote should be copied to the user's clipboard.
- 6) Type text into the comment box and press on the "Comment" button. The comment should appear under the quote.
- 7) Press on one of the stars. The rating should be updated.
